JOIN THE COLLAB WITH NATURE

WHY JUNCKERS?

By choosing Junckers woodcare you receive not only a product perfectly suited for surface treatment and protection of wooden floors, you are also drawing upon the expertise we have gained from our manufacture of solid hardwood floors since the 1930's.

The production of Junckers lacquers began in the 1950's and continues today at our main manufacturing plant in Denmark.

Our range of lacquers and oils has always been developed by our own technical and research teams using the best and most up to date materials and technology.

**TOTAL SOLUTIONS,
ALWAYS
ACCOMPANIED BY
PROFESSIONAL
TECHNICAL SUPPORT**

Junckers woodcare range includes a fully integrated range of products for regular maintenance, refurbishment or surface treatment of brand new wooden floors. We provide a 100% solution regardless of project type.

We produce woodcare products specially developed for residential, commercial, sports and dance floors.

All our products are designed to help maintain a healthy indoor climate, be kind to the environment and complement timber as a raw material, giving you the full environmental and health benefits hardwood floors offer.

During the manufacture of Junckers woodcare we use stringent quality control throughout. Our policy to never compromise on the quality of materials means customers will always get the most durable and beautiful finish possible and contractors can be confident they will be giving their customers the best possible result.

Finally, with Junckers as a professional partner you are sure to receive the correct technical support before, during and after a project. Junckers professional technical team together with our trained sales staff are always ready to assist you and help to ensure the successful completion of your project.

FILLING & PRIMING

Junckers filler and priming products form the basis for creating the most durable surface for a wooden floor. The products are always used in combination with a Junckers lacquer as part of our complete lacquer systems.

FILLING	 SB FILLER	PRIMING	 SB PRIMER
 DESCRIPTION	<p>A quick-drying solvent-based filler for filling gaps in the floor.</p> <p>Mixed with sanding dust from the sanded floor. It is used for filling gaps up to 2mm wide.</p> <p>SB Filler is used in combination with floor oil, solvent-based or water-based lacquers, and is suitable for most sanded and untreated parquet floors, including most exotic wood floors.</p>	 DESCRIPTION	<p>A solvent-based very fast curing primer.</p> <p>For wooden floors where water-based primers cannot be used due to poor adhesion, for example exotic and oily timbers.</p> <p>SB Primer gives the floor more depth of colour and must only be used directly on bare wood.</p>
 APPEARANCE	<p>Colourless. When mixed with sanding dust it dries to the same colour as the wood.</p>	 APPEARANCE	<p>Colourless when dry.</p>
 COVERAGE	<p>10 m²/litre.</p>	 COVERAGE	<p>10 m²/litre.</p>
 PACKAGE SIZE	<p>5 litres.</p>	 PACKAGE SIZE	<p>5 litres.</p>
 DRYING TIME*	<p>Approx. 15 minutes.</p>	 DRYING TIME*	<p>Approx. 30-60 minutes.</p>
 APPLICATION	<p>Broad full-edged stainless steel spatula.</p>	 APPLICATION	<p>Brush or short-pile roller.</p>

PRIMING

WB PRIMER

DESCRIPTION

One-component water-based acrylic primer.
Fast drying primer for use on untreated or machine sanded wooden floors in commercial, residential or sports areas.

By using a primer the risk of side-bonding between the individual floor boards is minimised. Protective coats of one of Junckers water-based floor lacquers must be applied after priming.

Choose WB Primer clear for the traditional look or WB Primer colour to create a lighter or darker atmosphere in the room. A coloured primer is slightly transparent and emphasises the natural grain structure of the wood.

For tropical timbers, oily woods and dark coloured pattern floors e.g. herringbone, best results will be achieved by using our SB Primer.

WB Primer Colour: A new way of colouring light timber floors like pine and oak. By adding colour to the primer you are able to both colour and prime at the same time and benefit from the same drying time as WB Primer clear.

APPEARANCE

Clear: Milky in the container. Dries to a colourless finish.
Nordic: Milky in the container. Dries to an untreated look, when used on light wood species like pine, beech, ash and oak.
White: Milky in the container. Dries to a transparent white finish.
Driftwood grey: Dark grey in the container. Dries to a subtle grey 'wash' finish.
Dark Coco: Dark brown in the container. Dries to a deep brown shade.

COVERAGE

8 m²/litre.

PACKAGE SIZE

Clear: 2.5 litres, 5 litres and 10 litres.
Dark Coco, Driftwood Grey, Nordic, White: 5 litres

DRYING TIME*

Approx. 1-2 hours.

FLOOR LACQUER

FOR COMMERCIAL AND RESIDENTIAL USE

Junckers offers a wide range of floor lacquers which have been specifically developed for residential and commercial use. The choice of product depends on expected levels of foot traffic. Available in three different sheen levels, which makes it possible to obtain a finish that suits your individual interior space. When lacquering floors which have been sanded to bare wood, use one of Junckers primers prior to applying the top coats of lacquer. Using a primer will help prevent any gluing effect between floorboards and there are a number of colour options available.

ADDED DURABILITY WITH TWO-COMPONENT LACQUERS

Junckers two-component lacquers are particularly well-suited for high traffic areas. This range is the benchmark for just how durable water-based lacquers can be, and the fast drying time of the product makes it a perfect choice when time is all-important. Junckers range of two-component lacquers sets the standard in today's market, achieving the highest degree of wear resistance and superior levelling properties compared to other similar products on the market.

MULTI-PURPOSE USE

MULTI-PURPOSE USE

OIL & HARDWAX OIL

Junckers oils add a beautiful, deep sheen and superior wear resistance to the floor. Choose either a clear oil, which emphasises the natural character of the wood, or a coloured oil, which allows you to create a unique look for your room or interior.

HARDWAX OIL AND
OIL

HARDWAX FLOOR OIL

ECO 2K FLOOR OIL

DESCRIPTION

Priming and finishing oil for untreated/sanded wooden floors.

Gives the floor a deep lustre and rich colour and is perfect for residential or commercial areas.

Ideal for use in locations where minimum closure time is important.

Cannot be overcoated with water-based lacquers.

Priming and finishing oil for untreated/sanded wooden floors.

Ready for use within one working day.

Low VOC content.

Use the oil with or without hardener. Add hardener for increased durability and water resistance.

Can be overcoated with a water-based lacquer, recommend using HT700.

APPEARANCE

Colourless when dry.

Clear oil: Adds a deep, warm glow to the wood.
Nordic oil: Retains an untreated look on light wood species. Not recommended on dark wood species.

The other colours are slightly transparent enhancing the natural grain of the wood.

COVERAGE

20-30 m²/litre.

Light wood species, beech, ash, oak, pine etc.: 12-15 m² per litre.
Exotic wood species, nyatoh, merbau etc.: 20-30 m² per litre.

PACKAGE SIZE

Clear: 5 litres.

Clear, nordic, white, london gery, black and antique oak: 2.53 litres (2.3+0.23).

DRYING TIME*

Recoating approx. 6 hours.
Fully cured after 6 days.

6-8 hours.
16-24 hours if the floor subsequently is to be lacquered.
Fully cured after 72 hours.

APPLICATION

Roller, brush, stainless steel spatula and/or polishing machine mounted with a white nylon scouring pad.

Roller, spatula and/or polishing machine mounted with a white nylon scouring pad.
