

Junckers Top Choice for BSF Programme in North West

Junckers specialist sports floors have been specified for no less than seven schools and learning centres for the Knowsley BSF programme. Laid by Junckers Approved Contractor Courtcraft Ltd, the project includes several sports halls, fitness studios and activity studios. Junckers' SylvaSport Premium was chosen from a range of competitive bids. Popular because it is considered 'builder-friendly' and economical, the floor appeals to specifiers and main contractors alike and so has been widely used in many BSF projects. It complies with the latest European performance standard (Area Elastic floor type A4 of BS EN 14904:2006) and is suitable over under floor heating.
