SYLVADISSOLVER
PRODUCT INFORMATION

GENERAL DESCRIPTION

SylvaDissolver is a waterbased degreaser designed for cleaning handball resin off floors.

The product is added to the freshwater tank in washing machines.

PRODUCT DESCRIPTION

Product: Dissolver concentrate for the proffessional cleaning of floors with residues of handball resin.

Package sizes: 5 and 10 litres.

TECHNICAL DATA

Coverage: 25-30 m² per litre of diluted product.

PH Value:
Product as supplied: Approx. 11.
Diluted for use: Approx. 8.

Before application: Shake/stir well before use.

Application tools: Cloth and atomizer or atomizer and washing maschine

Dilution: Dirty floors in general: 1 part to 20 parts of water. Very dirty floors: 1 part to 10 parts of water.

Declaration: 5-15 % non-ionic surfactants. <5 % kationic surfactants. <5 % EDTA.

Cleaning of tools: Soap and water immediately after use.

Storage: 1 year if unopened and stored at 20 °C. Not to be exposed to temperatures below 0 °C.

DIRECTION FOR USE

SylvaDissolver should be diluted with water before use. Adjust the scrubber dryer machine to normal walking speed, 4-5 km/hour. Fill tank with solution.

Apply diluted solution to an area so that it can work for maximum 3 minutes before vacuuming.

Spot areas of hard to remove resin can be wetted in concentrated SylvaDissolver before scrubber drying.

If the resin has not been removed during the first pass, repeat the cleaning procedure above and let the floor dry completely before further treatment.

When the handball resin has been removed from the sports floor, clean with SylvaSport Cleaner according to the product recommendations.

Always wipe up water spills quickly using a dry cloth to prevent water damage to the floor.

PRECAUTIONARY MEASURES

Before using the product, read the label on the container carefully and observe the recommended precautionary measures.

See Material Safety Data Sheet for detailed information.
